EDUCATION

B.Tech Computer Science & Engineering (AI & ML)

Amity University Punjab, Mohali

Expected 2027

4th Year Undergraduate

TECHNICAL SKILLS

Programming Languages:	Python, C++, SQL
Data & Analytics:	Pandas, NumPy, Matplotlib, Seaborn, Plotly, Data Analysis, Data Processing, Data Visualization, Feature Engineering, Feature Selection, Statistical Analysis
AI & Generative AI:	Generative AI, Large Language Models (LLMs), Prompt Engineering, AI Application Development
Frameworks/Tools:	Streamlit, Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Databases:	PostgreSQL
Machine Learning:	Machine Learning Models, Feature Engineering, Feature Selection

EXPERIENCE

BuzzClan — AI Intern

June 2026 – July 2026

- Developed an AI-powered IPL analytics platform covering 1,243 matches and 295,732 deliveries.
- Built data processing and analytics workflows using Python, Pandas, NumPy, and Plotly for team, player, and match insights.
- Integrated Groq LLMs with RAG and vector database-based retrieval to provide context-aware responses through an AI Cricket Assistant.
- Developed interactive analytics and comparison features using Streamlit and integrated AI capabilities into the application.

KEY PROJECTS

Multi-Modal Generative AI Commerce Orchestrator

- Developing a multimodal commerce orchestration platform leveraging Generative AI APIs to streamline cross-channel data flows and service interactions.
- Designing the system architecture, workflow logic, and information-routing mechanisms for integrated service orchestration.
- Building the platform end-to-end, with the frontend prototype currently implemented and backend, AI orchestration, and service integrations planned/in progress.

RA Risk Stratification System

- Analyzing clinical and lifestyle datasets to identify risk factors associated with Rheumatoid Arthritis.
- Performing Exploratory Data Analysis (EDA) to discover correlations between lifestyle habits and disease risk.
- Utilizing Data Visualization techniques to present findings and trends from complex patient data.

RELEVANT COURSEWORK:

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Network Security, Machine Learning, Operating Systems, Agile Software Development, Data Warehousing and Data Mining, Natural Language Processing, Deep Learning
